Description	<p>The IPRC is an international climate research center, with a focus on the Asia-Pacific region. The IPRC seeks to understand the climate system and how it may respond to human activity by conducting experiments with computer simulation models and by analyzing the many direct and remote observations related to climate. IPRC is a provider of down-scaled climate model data. IPRC also maintains a data center (Asia-Pacific Data Research Center) making atmospheric and oceanic data of relevance to the Asia-Pacific region readily available to its own researchers, the broader climate research community, policy makers and the general public.</p>
