Name	Center for Science and Technology Policy Research
Web	http://sciencepolicy.colorado.edu/
Description	The Center for Science and Technology Policy Research was initiated within the Cooperative Institute for Research in Environmental Sciences (CIRES) at the University of Colorado-Boulder in the summer of 2001 as a contribution both to the CIRES goal of “promoting science in service to society” and to the University’s vision of establishing research and outreach across traditional academic boundaries. CSTPR seeks to improve how science and technology policies address societal needs, through research, education and service.
