| Name | OAR Climate Program Office |
| Web | http://www.climate.noaa.gov/ |
| Description | NOAA's Climate Program Office provides strategic guidance and oversight for the agency's climate science and services programs. Designed to build knowledge of climate variability and change - and how they affect our health, our economy, and our future - the CPO's programs have three main objectives: 1) Describe and understand the state of the climate system through integrated observations, monitoring, and data management; 2) Understand and predict climate variability and change from weeks to decades to a century into the future; and 3) Improve society's ability to plan and respond to climate variability and change. |
| Logo | <p>The logo for the NOAA Climate Program Office. It features the NOAA circular seal on the left, which includes the text "NATIONAL OCEANOGRAPHIC AND ATMOSPHERIC ADMINISTRATION" and "U.S. DEPARTMENT OF COMMERCE". To the right of the seal, the text "CLIMATE PROGRAM OFFICE" is written in a large, bold, sans-serif font. Below this, in a smaller font, is the tagline "Understanding climate variability and change to enhance society's ability to plan and respond".</p> |
