Name	Pacific Climate Information System
Web	http://www.pacificcis.org/
Description	<p>The Pacific Climate Information System provides a programmatic framework to bring together ongoing and future climate observations, operational forecasting services and climate projections, research, assessment, data management, outreach, and education - an integrated system of climate services - to address the needs of the Pacific Islands. PaCIS is composed of representatives of regional, national and local institutions and programs in the Pacific, as well as selected individuals from other regions. It provides a forum for sharing the expertise, experience, and perspective needed to guide integrated program planning and product development.</p>
Logo	This is a larger version of the PaCIS logo described above, showing the colorful "PaCIS" text and the "PACIFIC CLIMATE INFORMATION SYSTEM" text below it.
