Name	Pacific Coastal & Marine Science Center
Web	http://walrus.wr.usgs.gov/
Description	The Pacific Coastal & Marine Science Center of the USGS studies the coasts of the western United States, including Alaska and Hawaii. Team scientists conduct research, monitor processes, and develop information about coastal and marine geologic hazards, environmental conditions, habitats, and energy and mineral resources. This information helps managers at all levels of government and in the private sector make informed decisions about the use and protection of national coastal and ocean resources.
Logo	The logo for the USGS Pacific Coastal & Marine Science Center. It features the USGS logo (a stylized eagle head) and the text "USGS science for a changing world" on the left. On the right, there is a graphic of a coastline with a blue and yellow color scheme. Below the graphic, the text "Pacific Coastal & Marine Science Center" is written in white on a dark blue background.
Types	- Federal
