Name	Pacific Islands Ocean Observing System
Web	<a href="http://www.soest.hawaii.edu/pacioos/">http://www.soest.hawaii.edu/pacioos/</a>
Description	<p>PacIOOS is one of eleven regional observing programs in the U.S. that are supporting the emergence of the U.S. Integrated Ocean Observing System (IOOS). Development of PacIOOS is guided through a collaborative governance framework and the program is administered and executed by the University of Hawaii School of Ocean and Earth Science and Technology (SOEST). With major funding from the National Oceanic and Atmospheric Administration (NOAA), SOEST, and the State of Hawaii, PacIOOS works to develop the observational, modeling, data management, and outreach components of an end-to-end ocean observing system to generate products that help to ensure a safe, clean, and productive ocean and a resilient coastal zone for the U.S. Pacific Islands.</p>
Logo	The logo for the Pacific Islands Ocean Observing System (PacIOOS) shows a scenic view of a tropical coastline with a steep, rocky cliff on the left, a sandy beach, and a small boat in the turquoise water. The sky is blue with some clouds. Overlaid on the right side of the image is the text "PacIOOS" in a large, light blue font, with a palm tree icon integrated into the letter 'O'. Below this, the full name "Pacific Islands Ocean Observing System" is written in a smaller, white font.
