

<b>Name</b>	Developing a Method for Adaptive Management and Protection from Climate Change in Mangrove and Coral Reef Ecosystems
<b>Capability Area: Impacts/Adaptations</b>	<ul style="list-style-type: none"> <li>- Understanding Climate Impacts and Informing Adaptation</li> <li>- Climate Adaptation</li> <li>- Assessment and Evaluation</li> </ul>
<b>Sectors</b>	- Ecosystems
<b>Status</b>	- Completed
<b>Focus Area</b>	- Marine and Terrestrial Ecosystems
<b>Regions</b>	<ul style="list-style-type: none"> <li>- South Pacific</li> <li>- Fiji</li> </ul>
<b>Description</b>	This project sought to develop a generalizable approach for assessing vulnerability and adaptation of mangroves and associated ecosystems in high biodiversity tropical mangrove areas and associated coral reef, sea-grass and upland ecosystems.
<b>Lead Agencies</b>	WWF, Wetlands International, Institute of Applied Sciences, Wildlife Conservation Society, communities
<b>Partnering Agencies</b>	<p>The information for this activity was provided by the Adaptation Partnership from their Pacific chapter review of planned and existing adaptation activities. These reviews provide an inventory of regional and country-level adaptation activities and a summary of key adaptation priorities, based on documents like the UN Framework Convention on Climate Change's National Adaptation Programs of Action and National Communications. They also identify gaps and opportunities for scaling up and enhancing collaboration. For more information see:</p> <p><a href="http://www.adaptationpartnership.org/images/stories/documents/asia - pacific regional and country profiles.pdf">http://www.adaptationpartnership.org/images/stories/documents/asia - pacific regional and country profiles.pdf</a></p>
<b>Required Resources</b>	GEF/UNEP, WWF, Partner organizations
<b>Projected Timelines</b>	2007-2011
