Name	Developing a Method for Adaptive Management and Protection from Climate Change in Mangrove and Coral Reef Ecosystems
Capability Area: Impacts/Adaptations	- Understanding Climate Impacts and Informing Adaptation - Climate Adaptation - Assessment and Evaluation
Sectors	- Ecosystems
Status	- Completed
Focus Area	- Marine and Terrestrial Ecosystems
Regions	- South Pacific - Fiji
Description	This project sought to develop a generalizable approach for assessing vulnerability and adaptation of mangroves and associated ecosystems in high biodiversity tropical mangrove areas and associated coral reed, sea-grass and upland ecosystems.
Lead Agencies	WWF, Wetlands International, Institute of Applied Sciences, Wildlife Conservation Society, communities
Partnering Agencies	The information for this activity was provided by the Adaptation Partnership from their Pacific chapter review of planned and existing adaptation activities. These reviews provide an inventory of regional and country-level adaptation activities and a summary of key adaptation priorities, based on documents like the UN Framework Convention on Climate Change's National Adaptation Programs of Action and National Communications. They also identify gaps and opportunities for scaling up and enhancing collaboration. For more information see: http://www.adaptationpartnership.org/images/stories/documents/asia - pacific regional and country profiles.pdf
Required Resources	GEF/UNEP, WWF, Partner organizations
Projected Timelines	2007-2011
