Name	Coastal and Marine Resources Management in the Coral Triangle of the Pacific				
Capability Area:	- Understanding Climate Impacts and Informing Adaptation				
Impacts/Adapt ations	- Climate Adaptation - Training and Capacity Building, Education, Outreach				
Sectors	- Ecosystems				
Status	- Ongoing				
Focus Area	- Marine and Terrestrial Ecosystems				
Regions	 - Western North Pacific - FSM - Palau - South Pacific - Fiji - PNG - Solomon Islands - Vanuatu 				
Description	To promote the conservation and sustainable use of globally significant coastal and marine resources in the Coral Triangle region through the introduction of integrated and ecosystembased coastal and marine resources management in five Pacific countries.				
Objectives/Out comes	Includes the implementation of pilot adaptation measures to enhance resilience and increase capacity to respond to the adverse impacts of climate change on coastal and marine ecosystems.				
Lead Agencies					
Partnering Agencies	The information for this activity was provided by the Adaptation Partnership from their Pacific chapter review of planned and existing adaptation activities. These reviews provide an inventory of regional and country-level adaptation activities and a summary of key adaptation priorities, based on documents like the UN Framework Convention on Climate Change's National Adaptation Programs of Action and National Communications. They also identify gaps and opportunities for scaling up and enhancing collaboration. For more information see: http://www.adaptationpartnership.org/images/stories/documents/asia - pacific regional and country profiles.pdf				
Required Resources	GEF-SPA; Japan; Australia; United States; Budget: US\$27,568,183				
Projected Timelines	2008-2013
