Projects and ActivitiesFri Mar 29 04:07:23 HST 2024

| Name | U.S. Support Program to the Coral Triangle Initiative |
|---|---|
| Capability Area: Impacts/Adaptations | - Understanding Climate Impacts and Informing Adaptation<br>- Climate Adaptation<br>- Training and Capacity Building, Education, Outreach<br>- Policies and Legislation |
| Sectors | - Agriculture and Fisheries<br>- Ecosystems |
| Status | - Ongoing |
| Focus Area | - Marine and Terrestrial Ecosystems |
| Regions | - South Pacific<br>- PNG<br>- Solomon Islands<br>- Other South Pacific |
| Description | To improve the management of biologically and economically important coastal and marine resources and associated ecosystems that support livelihoods and economies in the Coral Triangle and assist the six CTI countries in implementing the CTI Regional and National Plans of Action with activities that focus on instituting an ecosystem approach to fisheries management, creating marine protected areas, building climate change adaptive capacity and establishing regional platforms to promote cross-country learning and enhance sustainability. |
| Lead Agencies | WWF, Conservation International, the Nature Conservancy, ARD Inc., NOAA |
| Partnering Agencies | The information for this activity was provided by the Adaptation Partnership from their Pacific chapter review of planned and existing adaptation activities. These reviews provide an inventory of regional and country-level adaptation activities and a summary of key adaptation priorities, based on documents like the UN Framework Convention on Climate Change's National Adaptation Programs of Action and National Communications. They also identify gaps and opportunities for scaling up and enhancing collaboration. For more information see: http://www.adaptationpartnership.org/images/stories/documents/asia - pacific regional and country profiles.pdf |
| Required Resources | USAID, Budget: US$41 million |
| Projected Timelines | 2008-2013 |
