| Description | The overall objective is to strengthen the ability of communities in Papua New Guinea to make informed decisions about and adapt to climate change-driven hazards affecting both coastal and riverine communities. In particular, the program will focus on resilience towards occurrences of coastal and inland flooding events. Concept approved by Adaptation Fund Board in June 2011. |
| Objectives/Outcomes | The project concentrates on the following areas: 1) Adaptation measures in coastal and riverine communities; 2) Institutional strengthening; and 3) Awareness raising and knowledge management. |
| Lead Agencies | UNDP |
| Partnering Agencies | The information for this activity was provided by the Adaptation Partnership from their Pacific chapter review of planned and existing adaptation activities. These reviews provide an inventory of regional and country-level adaptation activities and a summary of key adaptation priorities, based on documents like the UN Framework Convention on Climate Change's National Adaptation Programs of Action and National Communications. They also identify gaps and opportunities for scaling up and enhancing collaboration.
