<b>Name</b>	Simple Well Improvement in Kiribati
Capability Area: Impacts/Adaptations	<ul style="list-style-type: none"> <li>- Understanding Climate Impacts and Informing Adaptation</li> <li>- Climate Adaptation</li> <li>- Training and Capacity Building, Education, Outreach</li> </ul>
Sectors	<ul style="list-style-type: none"> <li>- Public Health and Safety</li> <li>- Fresh Water Resources</li> </ul>
Status	- Proposed
Focus Area	<ul style="list-style-type: none"> <li>- Fresh Water Resources and Drought</li> <li>- Coastal Inundation/Sea Level Rise, Extreme Weather, and Community Resilience</li> </ul>
Regions	<ul style="list-style-type: none"> <li>- South Pacific</li> <li>- Kiribati</li> </ul>
Description	This project aims to reduce the burden of diarrhea and other water related diseases and problems particularly among very young and old people in Kiribati. This will be achieved by improving over the period of three years, 500 ground water wells that are used by the communities for their drinking and cooking.
Lead Agencies	MHMS
Partnering Agencies	The information for this activity was provided by the Adaptation Partnership from their Pacific chapter review of planned and existing adaptation activities. These reviews provide an inventory of regional and country-level adaptation activities and a summary of key adaptation priorities, based on documents like the UN Framework Convention on Climate Change's National Adaptation Programs of Action and National Communications. They also identify gaps and opportunities for scaling up and enhancing collaboration. For more information see: <a href="http://www.adaptationpartnership.org/images/stories/documents/asia - pacific regional and country profiles.pdf">http://www.adaptationpartnership.org/images/stories/documents/asia - pacific regional and country profiles.pdf</a>
Required Resources	Indicative costs: AUD 146,000; Local annual budget: AUD 190,470; Total NAPA costs over 3 years: AUD 336,470
Projected Timelines	3 years
