| Status   | - Proposed  |
| Focus Area                                     | - Coastal Inundation/Sea Level Rise, Extreme Weather, and Community Resilience  |
| Regions  | - South Pacific<br>- Kiribati   |
| Description                                    | This project aims to strengthen the capability of the<br>government to be able to keep abreast of, understand and<br>interpret international scientific information relevant to Kiribati.<br>To establish a central office to access and share information<br>on climate change issues from reliable regional and<br>international sources. To develop endogenous scientific<br>capability for analyzing and reviewing information, and<br>undertaking research related to climate change. To enhance<br>Kiribati capacity to implement its obligations under climate<br>change international agreements.   |
| Lead Agencies                                  |   |
| Partnering<br>Agencies                         | The information for this activity was provided by the<br>Adaptation Partnership from their Pacific chapter review of<br>planned and existing adaptation activities. These reviews<br>provide an inventory of regional and country-level adaptation<br>activities and a summary of key adaptation priorities, based<br>on documents like the UN Framework Convention on Climate<br>Change's National Adaptation Programs of Action and<br>National Communications. They also identify gaps and<br>opportunities for scaling up and enhancing collaboration. For<br>more information see:<br>http://www.adaptationpartnership.org/images/stories/documen<br>ts/asia - pacific regional and country profiles.pdf |
| Required<br>Resources                          | Indicative costs: AUD 227,000; Local annual budget: AUD 90,410; Total NAPA costs over 3 years: AUD 317,410  |
| Projected<br>Timelines                         | 3 years   |
