Projects and ActivitiesThu Mar 28 02:31:30 HST 2024

Name	Hawaii Ocean Resources Management Plan (ORMP)
Capability Area: Impacts/Adaptations	- Understanding Climate Impacts and Informing Adaptation - Climate Adaptation - Training and Capacity Building, Education, Outreach - Best Practices/Guidance - Policies and Legislation
Sectors	- Public Health and Safety - Energy - Transportation/Communication and Commerce - Community Planning and Development - Social and Cultural Resources - Agriculture and Fisheries - Recreation and Tourism - Ecosystems
Status	- Completed
Focus Area	- Coastal Inundation/Sea Level Rise, Extreme Weather, and Community Resilience - Marine and Terrestrial Ecosystems
Regions	- Central North Pacific - State Of Hawaii - North Western Hawaiian Islands
Description	The Hawaii Ocean Resources Management Plan (ORMP) sets forth guiding principles and recommendations for the State of Hawaii to achieve comprehensive and integrated ocean and coastal resources management. Section 205A-62, Hawaii Revised Statutes, charges the Office of Planning, Coastal Zone Management (CZM) Program, with the review and periodic update of the ORMP, as well as coordination of overall implementation of the plan. The ORMP was recently updated in July of 2013, and continues a place-based approach to management of ocean resources in the islands, based on recognition of the ecological connections between the land and sea, the link between human activities and its impacts on the environment, and the need for improved collaboration and stewardship in natural resources governance.

Objectives/Outcomes	The CZM Program has obtained the support of the Governor, Executive Branch, and the Legislature for implementing the 2013 ORMP. Charged with coordinating the implementation of the ORMP, an Executive-level, multi-agency Policy Group was established in the summer of 2007 to oversee the implementation and further development of the plan. The Working Group consisting of the managers and staff of the departments represented by the Policy Group focuses on ORMP implementation and are tasked with coordinating their agency's implementation efforts. The Working Group will also develop legislative proposals to further support implementation efforts. The Working Group continues to meet monthly to streamline implementation and to further develop the ORMP. The Policy Group meets twice annually to recommit staff time and support for ORMP implementation, to guide the work of the Working Group, and to approve their work tasks and recommendations for next steps.
Lead Agencies	State of Hawaii Office of Planning/Coastal Zone Management (CZM) Program
Contacts	http://planning.hawaii.gov/czm/
Partnering Agencies	Hawaii State agencies with responsibilities related to marine and coastal zone management, NOAA/PSC, NOAA/PIRO, NOAA/OCRM, USACE/Honolulu District, USN/Hawaii Region, USCG/14th District, EPA/Pacific Islands Office
Projected Timelines	Because change takes time, four phases of implementation were recognized. The ORMP maps incremental 5-year management priorities to embark on a new course of action and achieve the primary goal: to improve and sustain the ecological, cultural, economic, and social benefits we derive from ocean resources today and for future generations. The first phase, termed Demonstration, has started and begins to demonstrate how the guiding perspectives are being implemented through various partnerships throughout the state. Moving into the second phase, termed Adaptation, the perspectives would start being applied throughout all islands and in all areas. This leads to the third phase of Institutionalization that would come about ten years later in 2021. The final phase, Mainstreaming, is expected by twenty years, around 2030. The 2013 ORMP marks the beginning of the Adaptation Phase.
